Intend to achieve excellence in modern development technologies and provide better solutions to the organization.

## EXPERIENCE

### **Wipro Technologies**, Bengaluru, India — *Storage Engineer*

October 2019 - PRESENT

I have been hired for the Work Integrated Learning Programme (WILP) offered by Wipro Technologies. For 3 years, I have been working as a third party technical support engineer in a Dell EMC project.

EMC Data Storage Array Global Management Project supporting the dial home events and customer opened chats and Vic/Web Tickets related to EMC XtremIO. This includes detailed analysis of the problem, providing solutions to customers and helping customers with any other configuration that can be provided. Also having a good experience in working with Field Engineer and assisting with real time activity like storage component replacement/onsite troubleshooting.

- Comfortable in handling Power and Drive issues, Fiber loop and Script issues, Memory and Directors issues.

- Assisted Customer Engineer for onsite field activities.

- Worked closely with all levels of management to support storage and SAN infrastructure

- Resolving real time issues related to software & hardware while understanding the storage environment including Switches, zoning, masking, FC, FCoE, iscsi. Also providing solutions to management tool and also assisting while making changes on configuration.

- Currently working as a XtremIO storage engineer.

- Troubleshooting of XMS XtremIO X1 and X2 issues.

- Native replication Snapshot XVC

- Worked on XtremIO real time XMS and new XMS cluster installation
